---

This has been made in response to sabiners dress project, to give her some ideas. This could be used to create a statement obi belt for the dress, with a pleated frill used to trim the arms and neck. Try this technique out with paper first if you are unsure. Pleat the strip of fabric in the way shown, each visible 'square' should be equal in both length and width. Fold the corners of each pleat, sewing the points of the corners together. This can be finished with a bead in the centre of each origami square. Hope this helps!
