---

A simple tutorial how to save and prolong the life of your shrunk / small mittens.

---

## Step 1 — Find your mittens

Select the mittens you want to save.

---

## Step 2 — Cut them up!

Reanimated mittens

Cut the upper part and the thumb part. (\*You may also use ordinary gloves but you have to cut the finger parts up to the knuckles)

---

### **Step 3 — Sew the edges**

With a sewing machine, sew an ordinary stitch to prevent the stitches to unravel. Don't forget the thumb part.

---

### **Step 4 — Crochet!**

Then with a crocheting needle (mine was #3 /1.7mm) single crochet the edge. I started crocheting just below the line I stitched by machine. Do the same for the thumb part. If you have plain mittens you may employ a more decorative or lace edging, but this was not appropriate for my mittens because of the pattern, so that's why I left it plain.

---

### **Step 5 — You saved them!**

That's it! You are done! I don't think I 'll ever throw away my children's mittens.
