So I wanted to share this with you... This is a very quick and inexpensive way to make your tights into something spectacular, IÂ´m sure they will attract prying eyes and you can have all your tights combined with all your dresses for very little money... therefore, here we go with the tutorial.

Step 1 — Tutorial for paint tights.

Need... tights, textile paints, brush, the drawing that you want to paint on paper, clear plastic food storage and an empty bottle, I used a soda bottle, two- liter.... the diameter of the cylinder is approximately like the diameter of my leg.

Step 2 — Tutorial for paint tights.

First, make sure the bottle is clean and hasn't protrusions or sharp edges that can damage the tight. Taped the drawing on the bottle with adhesive tape and then wrap the bottle thoroughly with clear plastic, make sure that the bottle is completely wrapped in plastic.

Step 3 — Tutorial for paint tights.

Place the bottle inside the tight, make sure the place you want to make the painting is placed above the drawing...

Step 1 — Tutorial for paint tights.

Step 4 — Tutorial for paint tights.

Paint the tight, using as guides the drawing ... To make this, be generous with the paint, think that the tight is "transparent", so if you use little paint, the drawing will not be defined, it will be "translucent". No "pull" the brush when you are painting, the tight is elastic and your get "blurring" the drawing, giving little "touches" with the brush . Make sure the brush is always clean, use a glass of water and a clean fabric piece for "download" the brush when it's full of paint.

Step 5 — Tutorial for paint tights.

Let the paint dry completely.

Step 6 — Tutorial for paint tights.

I have left my tight dry until the next day. So now Iâ€™m going to decorate this beautiful bouquet of lavender... Remove the tight of the bottle with great care, it will be stuck to the bottle, so I put my hand into the tight to help it off without suffering any damage. Iâ€™m going to put a little bow on the bouquet, so I enter my hand with a small piece of paper in the place where I want to glue the bow. A bit of quick glue on the bow and place it on your chosen location, a few minutes to let the glue dry completely.. Then, carefully pull the paper from inside without damaging the tight...
