

Homemade boning

<http://www.burdastyle.com/techniques/homemade-boning>

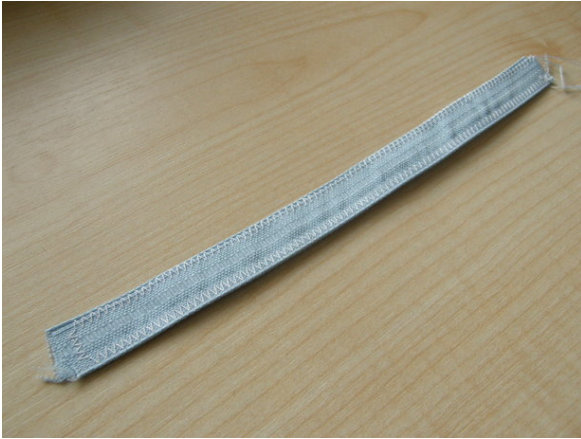

Local shop doesn't sell bones? Yeah... I know your problem... I made some myself from heavy weight(?) band and old plastic sipper centers.

Step 1 — Preapare bands

Cut the band to the lenght of the needed bone (inner+outer)

Step 2 — Sew the bands together

Sew the bands together with zig-zag (?) stitch leaving the top open

Step 3 — Put in the plastic

Title says it all....

Step 4 — Actually you're done but... I wasn't

Now from this on everything is optional, but if you're done, then sew the open top together :). Now.... I ironed the soon-to-be-bone to make it slimmer.

Step 2 — Sew the bands together

**Step 5 — Now something even more idiotic... sew over the bone
(definitely not recommended)**

Well... don't do it... but if you really want to... then do it
