

# Easy and uniform frogs

By: notoes

<http://www.burdastyle.com/techniques/easy-and-uniform-frogs>

---

Frogs are easy to make but it's not easy to make uniformly sized ones every time.

---

## Step 1 — Step 1

I have no idea what the round things are called since they were in my Mom's stuff but you can use anything round as it's the shape they make together that gives you the uniform frog shape. If anyone knows what they are let me know so I can call them what they really are. I used hot glue to glue them to a piece of old cardboard and waited for the glue to set up.

---

## Step 2 — Step 2

I pin one end of the cord off to the side and then follow the normal frog making directions you can usually find anywhere online.

---

### Step 3 — Step 3

Once you've made the frog loops, pin the other end and then hand stitch a few places to keep the shape intact and pull the frog off the template. Cut the ends to size and the frog is done.
