Infinity scarf tutorial. In this video tutorial I walk you through step-by-step how to sew up your own DIY infinity scarf. You only need a few supplies to make one: sewing machine, fabric, pins, thread, scissors, a hand sewing needle and a measuring tape. This is a great beginner sewing project that will make a great gift for yourself or anyone else in your life- man, woman or child! Play around with the length and width of the fabric you start with to make exactly the scarf you want. In this video I use a piece of stretch knit fabric that measures 24" x ~54" (width of fabric). The easiest way to start this scarf is to purchase about 2/3 yard (or 24") of a fabric that measures at least 54" on the width of the fabric. This will allow you to conserve fabric and use the entire piece without having any smaller scraps left over. If you use this method and purchase a full yard of fabric you will have enough to make 2 identical scarves.
