

Embellished Bag

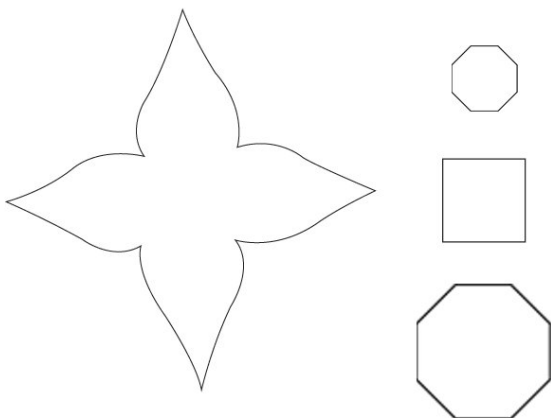

By: burdastyle

<http://www.burdastyle.com/techniques/embellished-bag>

Awaken and beautifully embellish your bag with artificial pedals. A bit of rubber, a few rivets and a hammer – and you're already designing your own unique accessory!

Step 1 — Print Template

Print the above template of shapes and scale to size you want with help of a photocopier or Photoshop.

Step 2 — Prepare Template

Trace out your templates onto cardboard and cut out.

Step 3 — Foam

Transfer the template outline onto the foam rubber with pencil. The number of flowers you'll need depends on the size of the bag.

Step 4 — Open Lining

Open the lining with a seam ripper, along the bag opening, on the side of the bag that is going to be decorated.

Step 5 — Make Holes

Mark the positions for the decorations with the felt pen and make holes with the awl.

Step 6 — Finish

Press the lower parts of the rivets through the holes, from the inside. Then attach the foam rubber shapes and top parts of the studs from the outside, as described on the packet. To finish, sew the lining closed again.
