---

These jeans I bought 2 sizes too big for me. I altered the with of legs and added some twist to the fabric itself.

---

## Step 1 — Required materials

You will need scissors, a pair of jeans, fabric tape, pencil or chalk, ruler

---

## Step 2 — Draw the lines

Decide where you will put the fabric alteration, draw the lines on the fabric accordingly.

---

### **Step 3 — Cut the lines**

Cut the lines with scissors

---

### **Step 4 — Cris-cross the tape**

Take the tape and cris-cross it through the cutted lines up-down-up-down...

---

## Step 5 — Add more tapes

Add to the fabric as much tapes as you need for your project, baste them to the main fabric as close as possible. Remember that the next tape goes the opposite directions to the previous tape.

---

## Step 6 — Topstitch the tapes

Top stitch the tapes on the fabric so everything is strong enough to wear. Hide the loose ends of tapes on the left side of the fabric.

---

## Step 7 — Ready!

You can wear your jeans now. You can use this technique for any garment - skirts, tote bag... curtains....

---
