---

I love experimenting with materials, styles and shapes. :) Fashion is my Art & Craft. A review on duchess satin from Alero Collections. This duchess satin is soft, silky to touch and look at. It is a heavier, thicker and slightly stiff variation of what we know satin to be. Made from a blend of silk and synthetic fibers, it's commonly used and suitable for bridalwear, fashion garments, accessories, home interior decor and various craft projects. Follow on <http://www.ebay.com/usr/alerocollections>. See other colours or options.
