---

I love experimenting with materials, styles and shapes. :) Fashion is my Art & Craft. A review on faux leather (leatherette) from Alero Collections. This faux leather is made from artificial fibers and placed on polyester-cotton surface. It's a heavy weight fabric. Its surface looks and feels like real leather. Suitable to for a wide range of sewing projects including fashion clothing, accessories and home interior decor. Follow on <http://www.ebay.com/usr/alerocollections>. See other colours or options.
